

ESG strategy consulting

We help you to define sustainable strategies and anchor company-specific sustainability goals in your processes. We also provide orientation in the regulatory jungle.

Service portfolio

Company level

- **Status quo / roadmap:** Maturity level measurement, ambition determination, impact analysis and development of a project plan
- **Focus:** Stakeholder / materiality analysis and value determination
- **Risk management:** risk/impact analyses
- **Strategy and objectives:** Development of an ESG strategy and definition of specific targets
- **Reporting:** Selection and filling of the appropriate format (GRI, GRESB, PRI, etc.)
- **Product design:** development of sustainability criteria for Art. 8 & 9 property funds
- **Carbon footprint:** Preparation of energy, waste, water and CO2 footprints in accordance with the GHG Protocol and derivation of recommendations for action and targets
